There are many books about philosophy, but Who Am I? And If So How Many? is different from the rest. Never before has anyone introduced readers

so expertly and, at the same time, so light-heartedly and elegantly to the big philosophical questions. Drawing on neuroscience, psychology, history, and even pop culture, Richard David Precht deftly elucidates the questions at the heart of human existence: What is truth? Does life have meaning? Why should I be good? and presents them in concise, witty, and engaging prose. The result is an exhilarating journey through the history of philosophy and a lucid introduction to current research on the brain. Who Am I? And If So, How Many? is a wonderfully accessible introduction to philosophy. The book is a kaleidoscope of philosophical problems, anecdotal information, neurological and biological science, and psychological research. The book is divided into three parts: 1) What Can I Know? focuses on the brain and the nature and scope of human knowledge, starting with questions posed by Kant, Descartes, Nietzsche, Freud, and others. 2) What Should I Do? deals with human morals and ethics, using neurological and sociological research to explain why we empathize with others and are compelled to act morally. Discusses the morality of euthanasia, abortion, cloning, and other controversial topics. 3) What Can I Hope For? centers around the most important questions in life: What is happiness and why do we fall in love? Is there a God and how can we prove God's existence? What is freedom? What is the purpose of life?

'Managing Cultural Diversity in Technical Professions' provides managers of technical professionals with clear and tested strategies to improve communication and increase productivity among culturally diverse technical professionals, teams, and departments. Dr. Laroche outlines the differences in education and training, career expectations, communication styles, and management expectations in countries around the world. He explains cross-cultural concepts and presents his case for the importance of cross-cultural competence supported by hard data, including charts, tables, and readily accessible schematics. You'll benefit from the author's experience and expertise as a manager and consultant in this area, illustrated by numerous anecdotes, critical incidents, and mini case studies, centered around two central themes: * Most technical professionals do not recognize the impact of cultural differences in their work * Cross-cultural issues lead to a significant under-utilization of talent and affect productivity negatively 'Managing Cultural Diversity in Technical Professions' offers proven tactics for improving your personal effectiveness and the efficiency of your multicultural teams, breaking the communication barrier in the multicultural workplace.

Who Am I and If So How Many? New Earth Publishing

This pioneering edited collection explores the question of how organizations manage the future. Moving away from traditional research which focuses on the past, the editors problematize the future as an inherent but under-examined part of organizing. Arguing that the future acts as both a driver of and a performative result of organizing, the book asks how organizations conceptualize and deal with the future and what processes are in place to handle things to come. With empirical research examining the practices, discourses and concepts that play key roles, organizations and their approaches are scrutinized. A timely compendium of theoretical discussion and practical implications on the relevance of the future, this book is essential reading for those interested in organization, sociology and management studies.

Focus on modern careers. 1 [BMS, A2] Hachette UK

A bookstore can be a wonderful, welcoming place of both commerce and curiosity. That's the goal for Woody, an American recently transferred to England to run a branch of Texts. He wants a clean, orderly store and lots of sales to show his bosses when they arrive from the States for a pre-Christmas inspection. Not easy given the shop's location in a foggy strip mall. And things keep going wrong. No matter how often the shelves are put in order before the doors are locked at night, when the staff returns in the morning, books are lying all over the floor, many damp and damaged beyond repair. The store's computers keep acting up-errors appear in brochures and ads and orders disappear completely. And even when the machines are turned off, they seem to glow with a spectral gray light. The hit-and-run death of an employee in the store's parking lot marks a turning point. One employee accuses another of making sexual advances and they come to blows. Between one sentence and the next, one loses his ability to read. The security monitors display half-seen things crawling between the stacks that vanish before anyone can find them. Desperate, Woody musters his staff for an overnight inventory. When the last customers reluctantly depart, leaving almost-visible trails of slime shining behind them, the doors are locked, sealing Woody and the others inside for a final orgy of shelving. The damp, grey, silent things that have been lurking in the basement and hiding in the fog may move slowly, but they are inexorable. This bookstore is no haven. It is the doorway to a hell unlike any other. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

For readers of Putin's People by Catherine Belton comes the stunning story of Russia's slide back into a dictatorship led by Vladimir Putin - and how the world is now paying the price. 'Brave, trenchant and convincing' Sunday Times 'Ferocious and unforgiving' Financial Times The ascension of Vladimir Putin - a former lieutenant colonel of the KGB - to the presidency of Russia in 1999 was a strong signal that the country was headed away from democracy. Yet in the intervening years - as America and the world's other leading powers have continued to appease him - Putin has grown not only into a dictator but an international threat. With his vast resources and nuclear arsenal, Putin is at the centre of a worldwide assault on political liberty and the modern world order. For Garry Kasparov, none of this is news. He has been a vocal critic of Putin for over a decade, even leading the pro-democracy opposition to him in the farcical 2008 presidential election. Yet years of seeing his Cassandra-like prophecies about Putin's intentions fulfilled have left Kasparov with a darker truth: Putin's Russia, like ISIS or Al Qaeda, defines itself in opposition to the free countries of the world. As

Putin has grown ever more powerful, the threat he poses has grown from local to regional and finally to global. In this urgent book, Kasparov shows that the collapse of the Soviet Union was not an endpoint - only a change of seasons, as the Cold War melted into a new spring. But now, after years of complacency and poor judgement, winter is once again upon us. Argued with the force of Kasparov's world-class intelligence, conviction and hopes for his home country, *Winter Is Coming* reveals Putin for what he is: an existential danger hiding in plain sight.

Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.
