Essentials of Paediatrics E-Book Elsevier Health Sciences

Gastroenterology & Nutrition is a new e-book in a collection of subject-themed e-books containing relevant key articles from Paediatrics & Child Health. The e-books provide a perfect source of revision for post-graduate exams in paediatrics and portfolio material for life-long learning. As well as mapping to the requirements of post-graduate training in paediatrics, these e-books also enable anyone with a short-term interest in a specific area to buy individual articles at a price-point that will give affordable access to all readers (from medical students to GPs and practitioners in related areas). The quality of user experience on mobiles, tablets and laptops will be an added bonus for learning on the move. About the journal The parent journal (<http://www.paediatricsandchildhealthjournal.co.uk/>) is a rolling, continuously updated review of clinical medicine over a 4-year cycle covering all the important topics for post-graduate exams in paediatrics. The journal's articles are refreshed, updated, augmented or replaced as appropriate each time the subject is due for revision to provide a concise overview of knowledge and practice core to the curriculum. Each article is written by invited experts and overseen by the relevant subject specialist on the Board. A trainee representative on the Board ensures relevance and accessibility for exam candidates.

Illustrated Textbook of Paediatrics Elsevier Health Sciences

This title is directed towards MRCPCH candidates in the UK and other countries where MRCPCH is offered. It provides a complete revision aid for the new OSCE-style MRCPCH clinical exam. It is designed and written to be as close as possible to the actual exam. Each chapter is a 'circuit' and will include all the written stations. The questions are laid out in exactly the same format as the exam, and the answers are written in a friendly style by authors who have recently been through the process and can offer valuable hints and tips. Sample questions mimic exam conditions - there are no clues to the answers, as is usually the case in more traditional system-based books. The fully explanatory answers provide not only clinical information but a framework for answering similar questions - extremely useful on the actual day of the exam. Can be used at the beginning of the revision process - to check progress and highlight weaknesses. Can also be used as a last-minute check right at the end of revision - to be sure all bases have been covered. Ideal for group revision work, especially for the communication and role-play stations.

Examination Paediatrics Elsevier Health Sciences

Working up a 'case' for presentation to the examiner is an integral part of clinical learning. Case presentations give opportunity for applying the knowledge of diseases and the clinical skills for evaluation and management of a patient. This practical application (of theory and clinical skills) is tested in practical examination in clinical subjects like paediatrics. This book helps enabling the logical application of theoretical knowledge and clinical skills in real life situations. This book contains details of several real cases, which are common in this part of the world. Each case provides description in a standard format and answers to the questions commonly asked at various stages of case presentation. Important points for communication with parents/patients are given in every case, which will help in developing communication and counseling skills related to a particular disease or condition. It prepares the reader for other components of practical examination in paediatrics, including x-rays, instruments, laboratory reports, and drugs. Annexure includes almost all charts required for clinical workup of a paediatric patient. Very special feature are case related videos on various topics, MCQs, whiteboard lectures on clinical approach to common conditions. In addition, this book comes with complimentary access to enhanced e-book.

Clinical Paediatrics - E - Book Elsevier Health Sciences

Fully revised, this is an updated new edition of a much-loved book which has built a reputation for pithy, entertaining good sense over the course of six editions. 'Children are different. Paediatrics is much more than medicine miniaturised.' From reviews of the previous edition: 'All in all a very handy book for the student, the resident or other professionals working with children. I had a lot of fun reading it.' 'The book is full of wonderful illustrations, and funny and profound advice with quotations, like the words of Sir Dominic Corrigan (1853): "The trouble with many doctors is not that they do not know enough but that they do not see enough", or the advice to teach thy tongue to say" "I do not know" (Rabbi Moses Maimonides or Rambam, 1135-1204). I have used this book for my final medical year paediatrics exams, the DCH and the MRCP and it has been a great help. It reminds us of the most important and basic things - history and examination, and of course a friendly demeanour.' Short, manageable chapters Clinical examples of examination techniques Very helpful tips and topics section Clinical checklists Simply illustrated Updated throughout New section of 'questions of fives' questions Short glossary of Latin terms
