 A thorough introduction to corporate finance from a renowned professor of finance and banking As globalization redefines the field of corporate finance, international and domestic finance have become almost inseparably intertwined. It's increasingly difficult to understand what is happening in capital markets

without a firm grasp of currency markets, the investment strategies of sovereign wealth funds, carry trade, and foreign exchange derivatives products. International Corporate Finance offers thorough coverage of the international monetary climate, including Islamic finance, Asian banking, and cross-border mergers and acquisitions. Additionally, the book offers keen

insight on global capital markets, equity markets, and bond markets, as well as foreign exchange risk management and how to forecast exchange rates. Offers a comprehensive discussion of the current state of international corporate finance Provides simple rules and pragmatic answers to key managerial questions and issues Includes case studies and real-world

decision-making situations For anyone who wants to understand how finance works in today's hyper-connected global economy, International Corporate Finance is an insightful, practical guide to this complex subject.

The research papers presented in

these proceedings volumes cover the latest developments and findings in the fields of mine health, safety, energy, waste management, reclamation and rehabilitation, mine closure and environmental protection.

Authors from over 20 countries with backgrounds in chemistry, engineering, technology and management, and hailing from the government, industry and academia,

have contributed to this book. The contents of this book will be of interest to scientists, engineers, consultants and government personnel who are responsible for the development and implementation of innovative approaches, techniques and technologies in the minerals industries. It will also benefit academic researchers, as it

addresses the latest advances in fundamental research.

The Governance of the Countryside
BoD – Books on Demand
Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated in to places of poverty and prosperity. Tracing the long arc of human history from hunter gatherer

societies to the early twenty first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and illuminating volume shows how the wealth of ‘the West’ and poverty of ‘the rest’ stem not from environmental factors or some unique European cultural, social or technological

qualities, but from the expansion of colonialism and the rise of America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between ‘developed’ and ‘developing’ nations and millions remain impoverished. Rather than address the

root causes of inequality, overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. The End of Development

provides a compelling account of how human history unfolded differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishme

nt is somehow part of the natural order of things. *Capital as Power* Univ. of Queensland Press

commercial fraud claims provides a readily accessible and detailed reference source for all those involved in commercial fraud litigation. The new edition includes an updated and much expanded treatment of all chapters in the light of recent developments, a more detailed treatment of interim relief (and sanctions for non-compliance) to reflect the increasing importance of

these topics in this area, as well as the introduction of new chapters on contempt of court, lifting the corporate veil, interim receivers, sham trusts and proprietary claims. the evolution of policies addressing energy and climate justice in South Africa. Drawing on a range of analytical perspectives, including socio-technical studies, just transitions, and critical political economy, it explains why South Africa's energy transition from a coal-dependent, centralised power generation and distribution system has been so slow,

<p>and reveals the types of socio-political inequalities that persist across regimes and energy sources. Topics explored include critical approaches to the South African state and its state-owned energy provider, Eskom; the political ecologies of coal and water; the politics of non-renewable energy alternatives; as well as the trajectory and fate of the Renewable Energy</p>	<p>Independent Power Producers Procurement Programme (REIPPPP), the country's major renewable energy policy. breached its intellectual property rights, entitling it to billions of dollars in compensation under international law. This news was not particularly shocking to the small team of which I was part, which had been assembled within the government's Office of International Law to respond to these types of claims. The news was shocking, though, to the wider

Australian community. Over the ensuing months, the community's disbelief became better-articulated in the press: How can an international tribunal sit in judgment over a measure which the Australian Parliament had decided was in the public interest after extensive scientific enquiry and public consultation? Could an international tribunal really reverse the

finding of Australia's highest court that the legislation was lawful?"--

This volume investigates the status of regional integration in Southern Africa. It discusses the critical challenges to be overcome and surveys the most interesting opportunities for achieving

deeper regional integration. *International Corporate Finance*, + *Website* World Bank Publications
An increasing number of people today cross the Beitbridge border of South Africa and Zimbabwe. This comes with a corresponding growth of creative strategies that seek to aid the crossing of those people and goods that may lack the necessary documentation. Such

'informal' border crossings have come to define one of the important economic regions in Southern Africa, the post-1994 Limpopo Valley. This thesis approaches routine acts of facilitating undocumented border crossings as an everyday social politics with deep historical roots. By use of archival and ethnographic methods, the thesis examines the social history and embodied practices of a variety of actors who engage in undocumented border crossings. A particular focus is placed on the role of private transporters (omalayitsha), who represent an important link between an exclusionary and yet fragmentary migration regime and undocumented travellers. In three theoretical and four empirical chapters, and inspired by border studies as well as the critical realist approach in migration studies, the thesis connects border practice to irregular movement and cheap labour within a regional context defined, in part, by dispossession. Through thick interpretations of the lived experience of border practice, the study also connects such political economic processes (e.g. migrant irregularity, labour precarity and

economic informality) to questions of social identity and migrant subjectivities. By situating the figure of the hyena at the centre of Southern African border struggles, the thesis invents an analytical concept that serves both an empirical and a theoretical task. Empirically, it enables a synthetic understanding of how everyday contestations around the possibility to work across the border for low-skill

migrants have been interacting, through time, with broader processes of capital accumulation to partly shape the region's migrant labour system. Theoretically, it shows how facilitation of undocumented border crossings calls for new sociological models that can account for processes that escape binary classification (as formal or informal, inclusive or exclusive, legal or illegal,

ordered or disordered), thus contributing to a better understanding of the role of migration in the contemporary world. Allt fler människor korsar idag gränsen vid Beitbridge mellan Sydafrika och Zimbabwe. Samtidigt sker en motsvarande ökning av kreativa strategier som gör att även personer och varor som saknar rätt handlingar kan ta sig över gränsen. Dessa

'informella' gränsövergångar har kommit att definiera vad som efter 1994 blivit en av de viktigaste ekonomiska regionerna i södra Afrika, Limpopodalen. I denna avhandling betraktas rutiner vid sådana oregistrerade gränsövergångar som en vardagens politik med djupa historiska rötter. Genom arkivstudier och etnografiska observationer undersöker avhandlingen en samhällshistoria och en mänsklig aktivitet där en rad aktörer är inblandade i en pågående, papperslös migration. En viktig roll i sammanhanget har omalayitsha, dvs. privata transportörer, som ofta är en viktig länk mellan de papperslösa resenärerna och den migrationsregimen som å ena sidan stänger dem ute och å andra sidan är så fragmenterad att de tillåts passera igenom. I tre teoretiska och fyra empiriska kapitel, samt med ett angreppssätt hämtat från gränsstudier (border studies) och den kritiskt realistiska skolan inom migrationsstudier, syftar avhandlingen till att förstå gränsövergångens praktik i förhållande till den irreguljära mobilitet och det överskott på billig arbetskraft som sätter sin prägel på en region där många är fattiga och fördrivna. I avhandlingens

djuptolkningar av migranternas levda erfarenhet vid gränsen förbinds i sin tur de politiskt-ekonomiska processerna (irreguljär migration, prekära arbetsvillkor och ekonomisk informalitet) med frågor om samhällelig identitet och migrantens subjektivitet. Avhandlingens ser hyenfiguren som central för förståelsen av de 'gränskamper' (border	struggles) som utkämpas i södra Afrika; med hyenan introduceras också ett analytiskt begrepp. Empiriskt sett möjliggör begreppet en syntetisk förståelse av hur vardagliga tvister och problem som präglar arbetsmigrantens försök att jobba på andra sidan gränsen över tid samverkar med större processer av kapitalackumulation, som delvis formar regionens migrantarbetsystem. I teoretiskt	avseende visar begreppet hur förhandlingarna som sker vid gränskontrollen klargör behovet av nya sociologiska modeller som kan redogöra för samhällsprocesser som undflyr varje binär klassificering (som formell eller informell, inkluderande eller exkluderande, legal eller illegal, ordnad eller oordnad), och på så vis bidrar det till en bättre förståelse av migrationens betydelse i

The Secret Club That Runs the World New Classics Library
 An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative

belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated

existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath. *Stranded Assets and*

elements of statist control even though it has liberalized foreign direct investment more than any other developing country in recent years. This mode of global economic integration reveals much about China's state capacity and development strategy, which is based on retaining government control over critical sectors while meeting commitments made to the World Trade Organization. In China's

Regulatory State, Roselyn Hsueh demonstrates that China only appears to be a more liberal state; even as it introduces competition and devolves economic decisionmaking, the state has selectively imposed new regulations at the sectoral level, asserting and even tightening control over industry and market development, to achieve state goals. By investigating in depth how China

implemented its economic policies between 1978 and 2010, Hsueh gives the most complete picture yet of China's regulatory state, particularly as it has shaped the telecommunications and textiles industries. Hsueh contends that a logic of strategic value explains how the state, with its different levels of authority and maze of bureaucracies, interacts with

new economic stakeholders to enhance its control in certain economic sectors while relinquishing control in others. Sectoral characteristics determine policy specifics although the organization of institutions and boom-bust cycles influence how the state reformulates old rules and creates new ones to maximize benefits and minimize costs after an initial phase of liberalization.

This pathbreaking analysis of state goals, government-business relations, and methods of governance across industries in China also considers Japan's, South Korea's, and Taiwan's manifestly different approaches to globalization. *Judging at the Interface* Canada Environment Canada Providing a practical analysis of the legal principles which govern the formation

factors facing thermal coal assets into actionable investment hypotheses for investors. By examining the fundamental drivers of environment-related risk, creating appropriate measures to differentiate the exposure of different assets to these risks, and linking this analysis to company ownership, debt issuance, and capital expenditure plans, our research can help to inform specific

To our knowledge, this report contains the most comprehensive and up-to-date analysis of the environment-related risks facing thermal coal companies that is publicly available. *Oil, Gas, and Mining* Createspace Independent Publishing Platform "It is

estimated that the world will need to produce as much food in the next forty years as it did in the past 8,000 years. Moving that food to where it is needed will require a massive investment in logistics, in port and transport infrastructure, as well as in distribution, processing and packaging networks within countries. Governments will not make those investments. Instead the task will fall

on the world's investments. Instead the task will fall on the world's commodity trading (merchandising) companies. When most people think of agricultural commodity merchangers, traders and speculators, they imagine dubious characters manipulating markets and pushing up food prices for the world's poor. Few people understand what agricultural traders actually do, and how their

markets function. This book is intended to at least partly correct that situation. It is aimed at students, journalists, legislators, regulators, and at everyone who would like to learn more about the sector."--
Quatrième de couverture
Current Debates in International Relations & Law Springer
Conventional theories of capitalism are mired in a deep crisis: after centuries of debate,

they are still unable to tell us what capital is. Liberals and Marxists both think of capital as an 'economic' entity that they count in universal units of 'utils' or 'abstract labour', respectively. But these units are totally fictitious. Nobody has ever been able to observe or measure them, and for a good reason: they don't exist. Since liberalism and Marxism

depend on these non-existing units, their theories hang in suspension. They cannot explain the process that matters most - the accumulation of capital. This book offers a radical alternative. According to the authors, capital is not a narrow economic entity, but a symbolic quantification of power. It has little to do with utility or abstract labour, and it extends far beyond machines and

production lines. Capital, the authors claim, represents the organized power of dominant capital groups to reshape - or reorder - their society. Written in simple language, accessible to lay readers and experts alike, the book develops a novel political economy. It takes the reader through the history, assumptions and limitations of mainstream economics and its associated

theories of politics. It examines the evolution of Marxist thinking on accumulation and the state. And it articulates an innovative theory of 'capital as power' and a new history of the 'capitalist mode of power'.

 In this collection of CUDES 2017, wide spectrum of topics that occupy

primary place in the current debates of International Relations and Law were addressed by the papers presented at the Current Debates in Social Sciences Conference which was held in Istanbul, on December 14-16, 2017. The purpose of this conference was to provide a forum for scholars, researchers and students to foster discussion and expand understanding on the current

themes of Social Sciences. In parallel to changing and multiplying dynamics of world politics, papers reflect diversity of issues in International Relations and Law including: the impacts of the Syrian Refugee Crisis on EU-Turkey relations, lone wolf terrorism, energy security, Russia's domestic factors in its foreign policy, foreign policy of Iran and Russia in the Middle East, Mirziyoyev's first year in

presidency, Turkish foreign aid under the Justice and Development Party, the place of civil aviation in Turkish foreign policy as a soft power instrument, the Kosovo intervention in the context of UN's human security discourse, UN and gender issues, mediation in international law and Turkey, the development of good corporate governance in Turkey, Ombudsman

institution in Turkey, the status of surviving spouse in terms of law of succession and the regime of participation in acquired property in Turkey, legitimacy of censorship in the West from the perspective of human rights, intellectual property protection for plant innovation, legal framework of 'autonomy in modern liberal eugenics', the impact of the new technologies

 Democracy and Electoral Politics in Zambia aims to comprehend the current dynamics of Zambia's democracy and to understand what was specific about the 2015/2016 election experience. While

elections have been central to understanding Zambian politics over the last decade, the coverage they have received in the academic literature has been sparse. This book aims to fill that gap and give a more holistic account of contemporary Zambian electoral dynamics, by providing innovative analysis of political parties, mobilization methods, the

constitutional framework, the motivations behind voters' choices and the adjudication of electoral disputes by the judiciary. This book draws on insights and interviews, public opinion data and innovative surveys that aim to tell a rich and nuanced story about Zambia's recent electoral history from a variety of disciplinary approaches.
