Mitochondria are not just another organelles in the cell, Mitochondria are the Fundamental Organelles. They provide Energy for all functions and are the Center of all types of Metabolic Pathways, and finally, they determine the Life& Death of a Cell by generating ROS and by controlling Apoptotic or Necrotic Death pathways of a Cell. Mitochondria are as infinite as genes, and in many respects to study mitochondrial functions is a much more difficult task than to study genes. In this book I share with the Reader some of my experiences in solving problems and pitfalls I have encountered during my studies of mitochondrial functions.

**The Early Dynasties of Sumer and Akkad** John Wiley & Sons  
'I am Zhang, alone with my light, and in that light I think for a moment that I am free.' Imagine a world where Chinese Marxism has vanquished the values of capitalism and Lenin is the prophet of choice. A cybernetic world where the new charioteers are flyers, human-powered kites dancing in the skies over New York in a brief grab at glory. A world where the opulence of Beijing marks a new cultural imperialism, as wealthy urbanites flirt with interactive death in illegal speakeasies, and where Arctic research stations and communes on Mars are haunted by their own fragile dangers. A world of fear and hope, of global disaster and slow healing, where progress can only be found in the cracks of a crumbling hegemony. This is the world of Zhang. An anti-hero who's still finding his way, treading a path through a totalitarian order - a path that just might make a difference.
