Many Chinese philosophic concepts derive from an ancient cosmology. This work is the first reconstructions of the mythic thought of the Shang Dynasty (ca. 1700- 1100 B.C.) which laid the foundation for later Chinese patterns of thought. Allan regards the myth, cosmology, divination, sacrificial ritual, and art of the Shang as different manifestations of a common religious system and each is examined in turn, building up a coherent and consistent picture. Although primarily concerned with the Shang, this work also describes the manner in which Shang thought was transformed in the later textual tradition.

The French writer and Nobel Literature laureate J.M.G. Le Clézio is

one of the most translated authors in the world and widely considered a living legend of French literature. He also harbors a keen interest in Korea that not only prompted him to learn and master the Korean language on his own but also inspired his new novel. BITNA: UNDER THE SKY OF SEOUL is Le Clézio's portrait of Seoul--its people and its places--rendered with an intimate familiarity and attention to detail that few non-Korean writers, not to mention non-natives of Seoul, could replicate. It is a story of life in the city.

The gap that divides those of us born in the 1970s and the older generation has never been so wide. Dark and edgy, deliciously naughty, an intoxicating cocktail of sex and the search for love, Shanghai Baby has already risen to cult status in mainland China. The risqué contents of the breakthrough novel by hip new author Wei Hui have so alarmed Beijing authorities that thousands of copies have been confiscated and burned. As explicit as Henry Miller's *Tropic of Cancer*, as shocking as *Trainspotting*, this story of a beautiful writer and her erotically charged affairs jumps, howls, and hits the ground running as it depicts the new generation rising in the East. Set in the centuries-old port city of Shanghai, the novel follows the days, and nights, of the irrepressibly carnal Coco, who waits tables in a café when she meets her first lover, a sensitive Chinese artist. Defying her parents, Coco moves in with her boyfriend and enters a frenzied, orgasmic world of drugs and hedonism. But, helpless to stop her gentle lover's descent into addiction, Coco becomes attracted to a boisterous Westerner, a rich German businessman with a penchant for S/M and seduction. Now, with an entourage of friends ranging from a streetwise madame to a rebellious filmmaker, Coco's forays into the territory of love and lust cross the borders between two cultures -- awakening her guilt and fears of discovery, yet stimulating her emerging sexual self. Searing a blistering image into the reader's imagination, Shanghai Baby provides an alternative travelogue into the back streets of a city and the hard-core escapades of today's liberated youth. Wei Hui's provocative portrayal of men, women, and cultural transition is an astonishing and brave exposure of the unacknowledged new China, breaking through official rhetoric to show the inroads of the West and a people determined to burst free.

Not so long ago, class actions were considered to be a textbook example of American exceptionalism; many of their main features were assumed to be incompatible with the culture of the civil law world. However, the tide is changing; while there are now trends in the USA toward limiting or excluding class actions,

notorious cases like Dieselgate are moving more and more European jurisdictions to extend the reach of their judicial collective redress mechanisms. For many new fans of class actions, collective redress has become a Holy Grail of sorts, a miraculous tool that will rejuvenate national systems of civil justice and grant them unprecedented power. Still, while the introduction of various forms of representative action has virtually become a fashion, it is anything but certain that attempting to transplant American-style class action will be successful. European judicial structures and legal culture(s) are fundamentally different, which poses a considerable challenge. This book investigates whether class actions in Europe are indeed a Holy Grail or just another wrong turn in the continuing pursuit of just and effective means of protecting the rights of citizens and businesses. It presents both positive and critical perspectives, supplemented by case studies on the latest collectivization trends in Europe's national civil justice systems. The book also shares the experiences of some non-European jurisdictions that have developed promising hybrid forms of collective redress, such as Canada, Brazil, China, and South Africa. In closing, a selection of topical international cases that raise interesting issues regarding the effectiveness of class actions in an international context are studied and discussed.

This book is the third volume in the European Environmental Law Forum (EELF) book series. The EELF is a non-profit initiative of

environmental law scholars and practitioners from across Europe aiming to support intellectual exchange on the development and implementation of international, European and national environmental law in Europe. One of the activities of the EELF is an annual conference. This book is comprised of fifteen contributions presented at the Third EELF Conference in Aix-en-Provence, hosted by the Central European Research Infrastructure Consortium, at Aix-Marseille University, September 2015. The central topic of the book is the effectiveness of environmental law. The impressive development in environmental law has not always been matched by corresponding improvements in environmental quality. The threats to our environment and, by extension, to our health have never been so numerous or serious. But paradoxically, the effectiveness of environmental law has been a long-neglected issue. This book offers a fruitful and stimulating dialogue between practitioners and academics, from varied countries and varied fields, combining empirical and theoretical approaches. The contributions go from classical-but still necessary-tools (control, criminal, administrative, civil sanctions, liability rules, strengthening of the regulatory structure, and the role of judges), to more innovative ones (public participation, effectiveness of instrument mixes, collaborative governance, hybrid governance, and private environmental enforcement). It's the start of a luminous Scandinavian summer, and Elsa, the matriarch of an eminent Helsinki family, is dying. Her family members gather around to support her, but their hidden struggles come, too. There's Elsa's granddaughter Anna, lost in her own world and concealing an unhappy affair that will not heal; Martti, Elsa's loving husband, whose dreams are haunted by the spectre of another woman; and Elsa's adult daughter Eleonoora, anxiously trying to deal with her mother's illness. As

Elsa's existence becomes more fragile, the anchors of Eleonoora's childhood memories begin to slip away, and the foundations upon which the family has built its life for forty years start to shift. One afternoon, Anna discovers a secret that goes to the very heart of her family — a secret that takes her back to the restlessness and change of the 1960s, a Europe in the throes of a social revolution, and a stranger named Eeva who entered her family's lives, changing them forever. As Eeva's story unfolds, Anna discovers a young woman who mirrors herself in many ways, and whose life illustrates both the danger of giving oneself up too completely to love and the necessity of doing so in order to truly live. Enthralling and beautifully drawn, True charts the experiences of three generations as they try to come to terms with a memory long repressed, and explores the mercy and tenderness that can come from a lie. Ultimately it asks: when we can never really know the people we love, how do we try to be true?
