*Stickleback Evolution
Virtual Lab* Virtual
Evolution Stickleback
Lab Answer In this lab,
students learn and
apply techniques for
analyzing the forms
and structures of
organisms — in
particular, the pelvic
structures of the
threespine stickleback
fish (*Gasterosteus
aculeatus*), a model
organism for studying
evolution. The lab
includes three modules
in which students
collect and analyze
data using

photographs of living
...Stickleback Evolution
Virtual Lab The Virtual
Stickleback Evolution
Lab is appropriate for
high school biology as
an excellent
companion to an
evolution unit. Because
the trait under study is
fish pelvic morphology,
the lab can also be
used for lessons on
vertebrate form and
function. In an ecology
unit, the lab could be
used to illustrate
predator-prey
relationships The
making of the Fittest:
Natural Selection and
Adaptation THE
VIRTUAL EVOLUTION
STICKLEBACK LAB . As
you complete each
part of the virtual lab,

answer the questions below in the space provided. QUESTIONS . INTRODUCTION . 1. Define "model organism." 2. How do spines protect ocean stickleback fish? 3. How did ancestral populations of ocean-dwelling fish come to live in freshwater lakes? 4. The making of the Fittest: Natural Selection and Adaptation About Answers to the virtual evolution stickleback lab. HHMI is a science philanthropy whose mission is to advance basic biomedical research and science education for the benefit of humanity.
