SOON TO BE A MAJOR

MOTION PICTURE

STARRING BLAKE LIVELY  
AND JUSTIN BALDONI!

From the #1 New York  
Times bestselling author  
of *It Starts with Us* and *All  
Your Perfects*, a “brave  
and heartbreaking novel  
that digs its claws into  
you and doesn’t let go,  
long after you’ve finished

it” (Anna Todd, New York  
Times bestselling author)  
about a workaholic with a  
too-good-to-be-true  
romance who can’t stop  
thinking about her first  
love. Lily hasn’t always  
had it easy, but that’s  
never stopped her from  
working hard for the life

she wants. She's come a long way from the small town where she grew up—she graduated from college, moved to Boston, and started her own business. And when she feels a spark with a gorgeous neurosurgeon named Ryle Kincaid, everything in Lily's life seems too good to be true. Ryle is assertive, stubborn, maybe even a little arrogant. He's also sensitive, brilliant, and has a total soft spot for Lily. And the way he looks in scrubs certainly doesn't hurt. Lily can't get him out

of her head. But Ryle's complete aversion to relationships is disturbing. Even as Lily finds herself becoming the exception to his "no dating" rule, she can't help but wonder what made him that way in the first place. As questions about her new relationship overwhelm her, so do thoughts of Atlas Corrigan—her first love and a link to the past she left behind. He was her kindred spirit, her protector. When Atlas suddenly reappears, everything Lily has built with Ryle is threatened.

An honest, evocative, and tender novel, *It Ends with Us* is "a glorious and touching read, a forever keeper. The kind of book that gets handed down" (USA TODAY).

*People of Today*

International Monetary Fund

The sports agent has become a highly significant figure in contemporary sport business. The role of the agent is essential to our understanding of labour markets and labour relations in an increasingly globalised

sports industry. Drawing on extensive empirical research into football around the world, this book explains what agents do, how their role has changed, and why this is important for future sport business. Offering analysis from economic, legal, social and historical perspectives, the book explores key topics such as: the history of sports agents including the emergence of the modern agent in US sport typologies and demographic profiles of agents in football

valuations and organisational analysis of leading European agents and agencies relations between agents and clubs future directions for research into sports agents. Focusing on the major European leagues, this book goes further than any other in illuminating an important but under-researched aspect of contemporary sport business. It is a valuable resource for any student, researcher or policy-maker with an interest in sport business, sport management, sport

policy, the economics of sport or labour economics.

Contract Law Routledge

This note aims to inform governments on how to account for tax expenditures and use that information in fiscal management. The emphasis is on developing and emerging market economies, where the use of such accounts is in its infancy because of data constraints, insufficient human and financial resources, and weak fiscal institutions. Most developing economies,

more-over, do not have tax policy units in their Ministry of Finance to provide analytical support to the government and legislature that integrates all revenue policy aspects. As a result, the tax policy framework can be fragmented: line ministries compete in the provision of sectoral tax incentives, but do not report on their cost. The note is organized as follows. The second section outlines the role that tax expenditure measurement and reporting can play in fiscal

management. The third section provides a step-by-step approach on how tax expenditure accounts can be built, with emphasis on data, methods and models, and institutional requirements. The section is concerned primarily with the direct cost of tax expenditures—that is, the revenue forgone because of them. It does not deal with their indirect costs, which could include economic efficiency losses and additional tax administration resources, and it does not address

assessment of the benefits of tax expenditures. The fourth summarizes the current status of tax expenditure reporting in developing economies, with some reference to advanced economies. The last section concludes. *Women, Business and the Law 2021* Springer Science & Business Media Some sections omitted from 2nd impression of the 105th ed.

International law is not merely a set of rules or processes, but is a professional activity practised by a diversity of figures, including scholars, judges, counsel, teachers, legal advisers and activists. Individuals may, in different contexts, play more than one of

these roles, and the interactions between them are illuminating of the nature of international law itself. This collection of innovative, multidisciplinary and self-reflective essays reveals a bilateral process whereby, on the one hand, the professionalisation of international law informs discourses about the law, and, on the other hand, discourses about the law inform the professionalisation of the discipline. Intended to promote a dialogue between practice and

scholarship, this book is a must-read for all those engaged in the profession of international law.

*Livres de France* OECD Publishing

The much-acclaimed BookTok sensation, Olivie Blake's *The Atlas Six*--now newly revised and edited with additional content. • The tag #theatlassix has millions of views on TikTok • A dark academic debut fantasy with an established cult following that reads like *THE SECRET HISTORY* meets *THE UMBRELLA ACADEMY* • The first in an explosive

trilogy The Alexandrian Society, caretakers of lost knowledge from the greatest civilizations of antiquity, are the foremost secret society of magical academicians in the world. Those who earn a place among the Alexandrians will secure a life of wealth, power, and prestige beyond their wildest dreams, and each decade, only the six most uniquely talented magicians are selected to be considered for initiation. Enter the latest round of six: Libby Rhodes and Nico de Varona,

unwilling halves of an unfathomable whole, who exert uncanny control over every element of physicality. Reina Mori, a naturalist, who can intuit the language of life itself. Parisa Kamali, a telepath who can traverse the depths of the subconscious, navigating worlds inside the human mind. Callum Nova, an empath easily mistaken for a manipulative illusionist, who can influence the intimate workings of a person's inner self. Finally, there is Tristan Caine, who can

see through illusions to a new structure of reality—an ability so rare that neither he nor his peers can fully grasp its implications. When the candidates are recruited by the mysterious Atlas Blakely, they are told they will have one year to qualify for initiation, during which time they will be permitted preliminary access to the Society's archives and judged based on their contributions to various subjects of impossibility: time and space, luck and thought, life and death.

Five, they are told, will be initiated. One will be eliminated. The six potential initiates will fight to survive the next year of their lives, and if they can prove themselves to be the best among their rivals, most of them will. Most of them. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**The Atlas Six** OECD Publishing

This book sheds light on the use of tax expenditures, mainly

through a study of ten OECD countries: Canada, France, Germany, Japan, Korea, Netherlands, Spain, Sweden, the United Kingdom and the United States. It highlights key trends and successful practices.

Thanks to recent progress in biotechnology, surrogacy, transplantation of organs and tissues, blood products or stem-cell and gamete banks are now widely used throughout the world.

These techniques improve the health and well-being of some human beings using products or functions that come from the body of others. Growth in demand and absence of an appropriate international legal framework have led to the development of a lucrative global trade in

which victims are often people living in insecure conditions who have no other ways to survive than to rent or sell part of their body. This growing market, in which parts of the human body are bought and sold with little respect for the human person, displays a kind of dehumanization that looks like a new form of slavery. This book is the result of a collective and multidisciplinary reflection organized by a group of international researchers working in the field of medicine and social

sciences. It helps better understand how the emergence of new health industries may contribute to the development of a global medical tourism. It opens new avenues for reflection on technologies that are based on appropriation of parts of the body of others for health purposes, a type of practice that can be metaphorically compared to cannibalism. Are these the first steps towards a proletariat of men- and women-objects considered as a reservoir of products of human

origin needed to improve the health or well-being of the better-off? The book raises the issue of the uncontrolled use of medical advances that can sometimes reach the anticipations of dystopian literature and science fiction.

Dictionnaire encyclopédique français-allemand et allemand-français Simon and Schuster

This handbook aims to facilitate a greater understanding of the OECD statistics and indicators produced and

so allow for their more effective use in policy analysis.

How the media are organised and funded is central to understanding their role in society. Critical Political Economy of the Media provides a clear, comprehensive and insightful introduction to the political economic analysis of contemporary media. Jonathan Hardy undertakes a critical survey of political economy scholarship

encompassing worldwide literature, issues and debates, and relationships with other academic approaches. He assesses different ways of making sense of media convergence and digitalisation, media power and influence, and transformations across communication markets. Many of the problems of the media that prompted critical political economy research remain salient, he argues, but the approach must continue to adapt to new conditions and challenges.

Hardy advances the case for a revitalised critical media studies for the 21st century. Topics covered include: media ownership and financing news and entertainment convergence and the Internet media globalisation advertising and media alternative media media policy and regulation Introducing key concepts and research, this book explains how political economy can assist students, researchers and citizens to investigate and address vital questions about the

media today.

The artificial intelligence (AI) landscape has evolved significantly from 1950 when Alan Turing first posed the question of whether machines can think. Today, AI is transforming societies and economies. It promises to generate productivity gains, improve well-being and help address global challenges, such as climate change, resource scarcity and health crises.

To gain a deep understanding of contract law, one needs to master not only the rules and principles of the field, but also its underlying theory and justification, and its long and intricate history. This book offers an accessible introduction to all aspects of American contract law, useful to both first-year law students and advanced contract scholars. The book is grounded on up-to-date scholarship and

contains detailed references to cases, statutes, Restatements and international legal principles. The book takes the reader from contract formation through interpretation and remedies, considering both the practical and theoretical aspects throughout. Each chapter also includes helpful lists of suggested further reading.

This introduces the history, development and current status of uniportal VATS by pioneers and authorities of this technique. The highly illustrated content in the chapters enhances readers to rapidly understand the techniques of uniportal VAT. The use of video clips adds value to the learning experience and applicability of the techniques. The contents

will be of great interest to thoracic surgeons who are already practicing video-assisted thoracic surgery, as well as those who are starting training. It will also serve as authoritative reference text for doctors, students and allied health professionals who would like to learn more about the new technique of uniportal VATS.  
World Guide to Higher Education World Bank Publications  
This multidisciplinary collection investigates the ways in which marriage and partner migration

processes have become the object of state scrutiny, and the site of sustained political interventions in several states around the world. Covering cases as varied as the United States, Canada, Japan, Iran, France, Belgium or the Netherlands, among others, contributors reveal how marriage and partner migration have become battlegrounds for political participation, control, and exclusion. Which forms of attachments (towards the family, the nation, or specific individuals) have

become framed as risks to be managed? How do such preoccupations translate into policies? With what consequences for those affected by them, in terms of rights and access to citizenship? The book answers these questions by analyzing the interplay between issues of security, citizenship and rights from the perspectives of migrants and policymakers, but also from actors who negotiate encounters with the state, such as lawyers, non-governmental

organizations, and translators.  
Vanity Fair Éditions de la Maison des sciences de l'homme  
 This book examines the active role of urban citizens in constructing alternative urban spaces as tangible resistance towards capitalist production of urban spaces that continue to encroach various neighborhoods. The collection of narratives presented here brings together research from ten different Asian cities and re-theorises the city

from the perspective of ordinary people facing moments of crisis, contestations, and cooperative quests to create alternative spaces to those being produced under prevailing urban processes. The chapters accent the exercise of human agency through daily practices in the production of urban space and the intention is not one of creating a romantic or utopian vision of what a city "by and for the people" ought to be. Rather, it is to place people in the centre as

mediators of city-making with discontents about current conditions and desires for a better life. Critical Political Economy of the Media Cambridge University Press

Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance,

effective dose to the pharmacist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use

of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for

readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort. Integration and Politics Among African States Women, Business and the Law 2021 is the seventh in a series of annual studies measuring the laws and regulations that affect women's economic opportunity in 190 economies. The project presents eight indicators structured around

women's interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year's report updates all indicators as of October 1, 2020 and builds evidence of the links between legal gender equality and women's economic inclusion. By examining the economic decisions women make throughout their working lives, as well as the pace of reform over

the past 50 years, Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women's economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women's access to justice. *Cities in Asia by and for the People*
