*Journals of the House of Commons of the Kingdom of Ireland*  
 Oxford University Press  
 Taking in hand the current "discovery" that we can listen to the cosmos, Andrew Hicks argues that sound-and the harmonious coordination of sounds, sources, and listeners-has always been an integral part of the history of studying the cosmos. In *Composing the World*, Hicks presents a narrative tour through medieval Platonic cosmology with reflections on important philosophical movements along the way. The book will resonate with a variety of readers, and it encourages us to rethink the role of music and sound within our greater understanding of the universe.  
*The Impact of Globalization on the World's Poor* SIU Press  
 Geopolitics and Development examines the historical emergence of development as a form of governmentality, from the end of empire to the Cold War and the War on Terror. It illustrates the various ways in which the meanings and relations of development as a discourse, an apparatus and an aspiration, have been geopolitically imagined and enframed. The book traces some of the multiple historical associations between development and diplomacy and seeks to underline the centrality of questions of territory, security, statehood and sovereignty to the pursuit of development, along with its enrolment in various (b)ordering practices. In making a case for greater attention to the evolving nexus between geopolitics and development and with particular reference to Africa, the book explores the historical and contemporary geopolitics of foreign aid, the interconnections between development and counterinsurgency, the role of the state and social movements in (re)imagining development, the rise of (re)emerging donors like China, India and Brazil, and the growing significance of South-South flows of investment, trade and development cooperation. Drawing on post-colonial and postdevelopment approaches and on some of the author's own original empirical research, this is an essential, critical and interdisciplinary analysis of the complex and dynamic political geographies of global development. Primarily intended for scholars and post-graduate students in development studies, human geography, African studies and international relations, this book provides an engaging, invaluable and up-to-date resource for making sense of the complex entanglement between geopolitics and development, past and present.

*Cyclopaedia of Biblical, Theological, and Ecclesiastical Literature*  
 Duke University Press

A massive set of classic books includes the most influential works of literature, philosophy, and science, in the history of the West. *A pictorial geography of the world, comprising a system of universal geography, popular and scientific* John Wiley & Sons  
 The purpose of this brief is to identify the critical issues concerning young people in rural areas that hold significance for FTA's ability to achieve impact at this time of rapid rural transformation; the key questions concerning youth that matter for F

*Music in Medieval Rituals for the End of Life* Springer

How should a literary scholar approach a text characterized not by stability but by variation and flux? This book offers a radical new perspective on the limits—and the accomplishments—of the modern traditions of textual criticism in classics. Sean Alexander Gurd takes as his starting point the case of a single Greek tragedy by Euripides, one of his last. According to ancient accounts, the Iphigenia at Aulis was produced at the city Dionysia, the great festival of Athenian tragedy, sometime after Euripides died (between 407 and 405 BCE). Whether the text performed then was entirely the work of Euripides, and whether the version that appears in the manuscripts reflects either that performance or its defunct author's design, are unknown. But since the mid-eighteenth-century the mysteries and conflicting evidence concerning Iphigenia at Aulis have given rise to an array of different attempts to reconstruct the original, and every generation has seen a version of the play that is radically different from those that came before. Gurd pioneers a literary philology comfortable with this textual multiplicity, capable of reading Iphigenias at Aulis in the plural. Regarding the dossier of successive editions of Iphigenia at Aulis as a symbol for the condition of modern textual reason, Gurd shows lovers of classical literature exactly how contingent the texts they read really are.  
**Great Books of the Western World: Plutarch** Oxford University Press

The text of thousands of speeches from all historical periods through the 19th century arranged in alphabetical order.

**The British Novelists; Comprising Every Work of Acknowledged Merit which is Usually Classed Under the Denomination of Novels. Accompanied with Biographical Sketches of the Authors, and a Critical Preface to Each**

**Work. By William Mudford. Embellished with Elegant Engravings [including Portraits].** Cornell University Press

The Musical Gift tells Sri Lanka's music history as a story of giving between humans and nonhumans, and between populations defined by difference. Author Jim Sykes argues that in the recent past, the genres we recognize today as Sri Lanka's esteemed traditional musics were not originally about ethnic or religious identity, but were gifts to gods and people intended to foster protection and/or healing. Noting that the currently assumed link between music and identity helped produce the narratives of ethnic difference that drove Sri Lanka's civil war (1983-2009), Sykes argues that the promotion of connected music histories has a role to play in post-war reconciliation. The Musical Gift includes a study of how NGOs used music to promote reconciliation in Sri Lanka, and it contains a theorization of the relations between musical gifts and commodities. Eschewing a binary between the gift and identity, Sykes claims the world's music history is largely a story of entanglement between both paradigms. Drawing on fieldwork conducted widely across Sri Lanka over a span of eleven years--including the first study of Sinhala Buddhist drumming in English and the first ethnography of music-making in the former warzones of the north and east--this book brings anthropology's canonic literature on "the gift" into music studies, while drawing on anthropology's recent "ontological turn" and "the new materialism" in religious studies.

**English Composition and Rhetoric** CIBOR

In this book, author Martin Munro offers a new path into Caribbean studies based on sound. He argues that to understand and begin to transform the past, present, and future of Caribbean studies, historians must do so at the node of both sound and vision. It is a transnational, multidisciplinary study that will interest anyone who knows or wishes to learn about the Caribbean.

**The Music of the Future** Springer Nature

This book offers a comprehensive view of multimodal composing and literacies in multilingual contexts for ESL and EFL education in United States of America and globally. It illustrates the current state of multimodal composing and literacies, with an emphasis on English learners' language and literacy development. The book addresses issues concerning multilinguals' multimodal composing and reflects on what the nexus of multimodality, writing development, and multilingual education entails for future research. It provides research-driven and practice-oriented perspectives of multilinguals' multimodal composing, drawing on

empirical data from classroom contexts to elucidate aspects of multimodal composing from a range of theoretical perspectives such as multiliteracies, systemic functional linguistics, and social semiotics. This book bridges the gap among theory, research, and practice in TESOL and applied linguistics. It serves as a useful resource for scholars and teacher educators in the areas of applied linguistics, second language studies, TESOL, and language education.

*Iphigenias at Aulis* Routledge

In what ways is music implicated in the politics of belonging? How is the proper at stake in listening? What role does the ear play in forming a sense of community? Music and Belonging argues that music, at the level of style and form, produces certain modes of listening that in turn reveal the conditions of belonging. Specifically, listening shows the intimacy between two senses of belonging: belonging to a community is predicated on the possession of a particular property or capacity. Somewhat counter-intuitively, Waltham-Smith suggests that this relation between belonging-as-membership and belonging-as-ownership manifests itself with particular clarity and rigor at the very heart of the Austro-German canon, in the instrumental music of Haydn, Mozart, and Beethoven. Music and Belonging provocatively brings recent European philosophy into contact with the renewed music-theoretical interest in *Formenlehre*, presenting close analyses to show how we might return to this much-discussed repertoire to mine it for fresh insights. The book's theoretical landscape offers a radical update to Adornian-inspired scholarship, working through debates over relationality, community, and friendship between Derrida, Nancy, Agamben, Badiou, and Malabou. Borrowing the deconstructive strategies of closely reading canonical texts to the point of their unraveling, the book teases out a new politics of listening from processes of repetition and liquidation, from harmonic suppressions and even from trills. What emerges is the enduring political significance of listening to this music in an era of heightened social exclusion under neoliberalism.

*The Routledge Companion to Music, Mind, and Well-being* Oxford University Press

This is the first study of U.S. composer Maryanne Amacher (1938-2009), an elusive and original figure in music composition, sound art, installation, and media aesthetics. *Wild Sound* animates her creative and speculative approaches to how sound can be heard: as a fictional narrative, as a long distance connection, as a music composed of tones that originate inside the listener's inner ear.

*Conscripts of Modernity* Oxford University Press

"Medieval documents reveal that for centuries of European history, singing for a person at the moment of death was considered to be the ideal accompaniment to a life's ending. Rituals for the dying were well developed, practiced widely, and thoroughly integrated with music. Indeed, these rituals reveal that music, rather than the Eucharist, held a privileged position at the final breath. Music in *Medieval Rituals for the End of Life* examines and recovers, to the extent possible, the music sung for the dying during the Middle Ages. The book offers a view of the plainchant repertory through the sources of individual institutions. The first four chapters contain a series of "case studies": close readings of rituals from diverse communities, each as they appear in a single source. The rituals' chants are transcribed into modern notation and analyzed, both for their relationships between text and melody and for their functions within the rituals. Created for the powerful and the poor, the educated and the uneducated, women and men, monastics, clerics, and laity, these manuscripts offer a glimpse into the religious practices that distinguished communities from one another and bound them together within a single tradition. The book provides the first editions of the rituals' chants and considers the functions of the music. Why was music given such a prominent position within the deathbed liturgies? Why did communities gather and sing when a loved one was dying? The manuscripts reveal a lost art of comforting the dying and the grieving"--

*The Literary World* Routledge

COMPARATIVE URBANISM 'Comparative Urbanism fully transforms the scope and purpose of urban studies today, distilling innovative conceptual and methodological tools. The theoretical and empirical scope is astounding, enlightening, emboldening. Robinson peels away conceptual labels that have anointed some cities as paradigmatic and left others as mere copies. She recalibrates overly used theoretical perspectives, resurrects forgotten ones long in need of a dusting off, and brings to the fore those often marginalised. Robinson's approach radically re-distributes who speaks for the urban, and which urban conditions shape our theoretical understandings. With Comparative Urbanism in our hands, we can start the practice of urban studies anywhere and be relevant to any number of elsewhere.' Jane M. Jacobs, Professor of Urban Studies, Yale-NUS College, Singapore 'How to think the multiplicity of urban realities at the same time, across different times and rhythmic arrangements; how to move with the emergences and stand-stills, with conceptualisations that do justice to all things gathered under the name of the urban. How to imagine comparatively amongst differences that remain different, individualised outcomes, but yet exist in-common. No book has so carefully conducted a specifically urban philosophy on these matters, capable of beginning and ending anywhere.' AbdouMaliq Simone, Senior Research Fellow, Urban Institute, University of Sheffield The rapid pace and changing nature of twenty-first century urbanisation as well as the diversity of global urban experiences calls for new theories and new methodologies in urban studies. In *Comparative Urbanism: Tactics for Global Urban Studies*, Jennifer Robinson proposes grounds for reformatting comparative urban practice and offers a wide range of tactics for researching global urban experiences. The focus is on inventing new concepts as well as revising existing approaches. Inspired by postcolonial and decolonial critiques of urban studies she advocates for an experimental comparative urbanism, open to learning from different urban experiences and to expanding conversations amongst urban scholars across the globe. The book features a wealth of examples of comparative urban research, concerned with many dimensions of urban life. A range of theoretical and philosophical approaches ground an understanding of the radical revisability and emergent nature of concepts of the urban. Advanced students, urbanists and scholars will be prompted to compose comparisons which trace the interconnected and relational character of the urban, and to think with the variety of urban experiences and urbanisation processes across the globe, to produce the new insights the twenty-first century urban world demands.

*Geopolitics and Development* John Wiley & Sons

At this stalled and disillusioned juncture in postcolonial history—when many anticolonial utopias have withered into a morass of exhaustion, corruption, and authoritarianism—David Scott argues the need to reconceptualize the past in order to reimagine a more usable future. He describes how, prior to independence, anticolonialists narrated the transition from colonialism to postcolonialism as romance—as a story of overcoming and vindication, of salvation and redemption. Scott contends that postcolonial scholarship assumes the same trajectory, and that this imposes conceptual limitations. He suggests that tragedy may be a more useful narrative frame than romance. In tragedy, the future does not appear as an uninterrupted movement forward, but instead as a slow and sometimes reversible series of ups and downs. Scott explores the political and epistemological implications of how the past is conceived in relation to the present and future through a reconsideration of C. L. R. James's masterpiece of anticolonial history, *The Black Jacobins*, first published in 1938. In that book, James told the story of Toussaint L'Ouverture and the making of the Haitian Revolution as one of romantic vindication. In the second edition, published in the United States in 1963, James inserted new material suggesting that that story might usefully be told as tragedy. Scott uses James's recasting of *The Black Jacobins* to compare the relative yields of romance and tragedy. In an epilogue, he juxtaposes James's thinking about tragedy,

history, and revolution with Hannah Arendt's in *On Revolution*. He contrasts their uses of tragedy as a means of situating the past in relation to the present in order to derive a politics for a possible future.

*Select British Eloquence; Embracing the Best Speeches Entire, of the Most Eminent Orators of Great Britain for the Last Two Centuries; with Sketches of Their Lives, an Estimate of Their Genius, & Notes, Critical & Explanatory* Oxford University Press *Refiguring in Black* is a meditation on black life, and a meditation on the questions and concerns with which black life is confronted. It takes the form of a critical engagement with the thought of Frederick Douglass, Toni Morrison, Hortense Spillers, and Charles Mingus – key figures in the black radical tradition. Sithole does not reduce these thinkers to biographical subjects but examines them as figures of black thought in ways that are creative and generative. Erudite and passionate, this book is a statement of and testimony to refiguring as a form of critical practice by those who are engaged in a radical refusal, and thus part of the long arc of the black radical tradition. As a way of understanding the contemporary moment and unmasking antiblackness in all its forms and guises, Sithole's work brings the annals of black thought into being in order to think differently and necessitate rupture, refusing to concede to the order of things and refusing to be complicit in the dehumanization that has marked the black condition.

*History of the Presbyterian Church in Ireland, Comprising the Civil History of the Province of Ulster from the Accession of James the First to the Year 1735 Continued to the Present Time*, by W. D. Killen

This book examines the various channels and transmission mechanisms, such as greater openness to trade and foreign investment, economic growth, effects on income distribution, technology transfer and labour migration through which the process of globalization affects different dimensions of poverty in the developing world.

*The Friends' Library: Comprising Journals, Doctrinal Treatises, and Other Writings of Members of the Religious Society of Friends*

In recent decades, the relationship between music, emotions, health and well-being has become a hot topic. Scientific research and new neuro-imaging technologies have provided extraordinary new insights into how music affects our brains and bodies, and researchers in fields ranging from psychology and music therapy to history and sociology have turned their attention to the question of how music relates to mind, body, feelings and health, generating a wealth of insights as well as new challenges. Yet this work is often divided by discipline and methodology, resulting in parallel, yet separate discourses. In this context, *The Routledge Companion to Music, Mind and Well-being* seeks to foster truly interdisciplinary approaches to key questions about the nature of musical experience and to demonstrate the importance of the conceptual and ideological frameworks underlying research in this field. Incorporating perspectives from musicology, history, psychology, neuroscience, music education, philosophy, sociology, linguistics and music therapy, this volume opens the way for a generative dialogue across both scientific and humanistic scholarship. The Companion is divided into two sections. The chapters in the first, historical section consider the varied ways in which music, the emotions, well-being and their interactions have been understood in the past, from Antiquity to the twentieth century, shedding light on the intellectual origins of debates that continue today. The chapters in the second, contemporary section offer a variety of current scientific perspectives on these topics and engage wider philosophical problems. The Companion ends with chapters that explore the practical application of music in healthcare, education and welfare, drawing on work on music as a social and ecological phenomenon. Contextualising contemporary scientific research on music within the history of ideas, this volume provides a unique overview of what it means to study music in relation to the mind and well-being.

*Music and Belonging Between Revolution and Restoration* English Composition and Rhetoric. A Manual. 2nd Ed
