Derek Jarman's Garden is the last book Jarman ever wrote. It is a

fitting memorial to a brilliant and greatly loved artist and film maker who, against all odds, made a breathtaking garden in the most inhospitable of places the flat, bleak, often desolate expanse of shingle overlooked by the Dungeness nuclear power station. Here is Jarmans own record of how the garden evolved, from its earliest beginnings in 1986 to the last year of his life. More than 150 photographs by his friend Howard Sooley capture the garden at all its different stages and at every season of the year, revealing its complex geometrical plan, magical stone circles and the beautiful and bizarre sculptures. We also catch glimpses of Jarman at work on the garden. This beautiful book will appeal to all those who love gardens and gardening, as well as the legions of admirers of this extraordinary man.

Let the experts at the Royal Botanic Gardens in Kew e-guide you around the beautiful and mysterious world that is the plant kingdom. From regulating the air we breathe, to providing food, clothes, fuels, and medicines - plants are fundamental to our lives. Discover an extraordinary diversity of species, which includes a grass that grows a metre a day, roots that breathe air, and "queen of the night" cactuses whose rare blooms vanish before dawn. In a combination of art and science, Flora celebrates plants from majestic trees to microscopic algae, explaining how they germinate, grow, and reproduce. It presents

species that have evolved to accommodate pollinating insects such as the foxglove, and plants that have adapted to flourish in even the most hostile of habitats. Pierre-Joseph Redoute in the 18th-century was described as the "Raphael of flowers". Flora showcases his botanical paintings as well as those of Georg Ehret and others in this gorgeous visual celebration of plants through the ages. Whether you are a keen gardener, naturalist, or botany student, this beautiful ebook is a treat that will entice, inform, and amaze.
